MINUTES:

Minutes of the March 14, 2009 Board of Directors' Meeting read. Motion made by Jackye Phillips to accept the Minutes as presented. Motion seconded by Charles Hoff/CARRIED.

OPEN FORUM: For public testimony

Kate Whitehouse, Administrator, Gold Country Retirement Center spoke on behalf of the residents regarding the bills they have received from the District. The residents nor the facility can afford these bills. Ms. Whitehouse is requesting the residents not be billed or billed at a reduced rate, or to possibly negotiate a yearly fee to be paid by the Center.

Ken Whipple, owner of a private ambulance service out of Sacramento spoke regarding working out of El Dorado County West Slope on type Code 2 calls, and not taking away calls such as 911 calls. Private companies are used for transport of non 911 calls.

Former board member, Bud Baker spoke on behalf of the volunteers, stating that all through the past years the Board and personnel never billed for services and kept the tax rate down.

Chief Cunningham spoke stating the District has been frugal, funded exclusively by property taxes by the citizens of this District. Service Area 7 does not provide proper service. The District does not get paid for the service and is responsible for the liability, etc, no revenue is received for it. If calls don't go through 911, the District does not provide fire personnel to the scene. The retirement facilities are 10% of what the District does. The law states that the District cannot bill tax payers for non-tax payer bills. Chief Cunningham explained the situation stating most of the equipment is staffed by volunteers from their homes or other districts loan their personnel and equipment to the retirement housing foundations. He further stated the District has offered to negotiate the billing fee on many occasions through the past years with no response. The District is voting on alternative fee schedules, are not here to make money.

Questions heard and responded to: It was questioned as to why a fire engine always shows up on 911 calls. The personnel from the engine show to help transport the equipment to the scene and back, also helping to carry the injured party to the ambulance. This also lessens the possibility of injury to personnel/volunteers. There must always be 2 personnel on the gurney at all times. 911 calls discuss further and the time issues involved. There is always a paramedic on an engine and at many times, the 1st at the scene which has proven to be life saving if they are at the scene within the 1st 6 minutes. Fire Districts discussed in more detail and their history of development.

Ken Whipple, Chief Cunningham and Asst. Chief Robert Combs explained the differences between 911 calls and the personnel needed in comparison to a private ambulance call for a less severe problem. All Districts' engines are ALS (Advanced Life Support) and can be at the scene before an ambulance which can be a life saving issued.

Kate Whitehouse spoke regarding 911 calls and decisions behind the determination of 911 calls. 911 calls are made at the order of the physician. If independent living, the person makes their own decision as to whether or not it will be a 911 call.

Chief Cunningham and Ms. Whitehouse will get together and discuss fee reduction, etc. The fee will be the obligation of the Retirement Housing Assoc. and would not be passed to the residents.
